

### **REMARKS**

In response to the Notice to File Corrected Application Papers mailed April 1, 2011 (hereinafter "Notice"), Applicant provides the following remarks to accompany the amendments to the Drawings and the Specification.

#### **Drawing Remarks**

Replacement drawing sheets 1-13 are provided. The replacement drawings contain no new subject matter.

The Notice identifies as a drawing deficiency that "An ink stamp or the image thereof obscures part of the illustration. FIG(s) Fig. 1." In response, Replacement Sheet 1 is provided having FIG. 1 not obscured by a USPTO date-in ink stamp. No new matter is added.

The Notice identifies as a drawing deficiency that "OTHER: Fig. 9-11" and "COMMENTS: The Drawings and brief description section of the specification are both missing figs. 9-11." Applicant respectfully notes that figures in the previously submitted drawings were not sequential numbered consistently in both the drawings and the specification. Accordingly, FIGS. 12-22 along with corresponding language of the Specification have been renumbered to FIGS. 9-19 so as to make the figure numbers sequential and to correspond to the amendments to the specification, also provided in this response. No new matter is added.

A numerical labeling clerical correction for steps originally labeled 70 and 72 in FIG. 18 (previously FIG. 21) is also provided. Accordingly, FIG. 18 has been amended consistent with the corresponding language of the Specification (i.e., steps 70 and 72 are now steps 71 and 73, respectively). No new matter is added.

Further, Replacement Sheets 1-13 corresponding to renumbered Figures 1-19 are also provided to provide higher quality images of these drawings. No new matter is added.

#### **Specifications Remarks**

Specification amendments are also provided to make the figure numbers sequential. Specification amendments correcting clerical errors are also provided. The replacement drawings and specification amendments contain no new subject matter.

Applicant respectfully notes that the original specification text "Packet Loss Counter (PLC)" on page 11, line 23 was underlined and does not reflect an amendment to the as-filed specification. Applicant further respectfully notes that the original specification text "Latency" on page 12, line 18 was underlined and does not reflect an amendment to the as-filed specification. Applicant further respectfully notes that the original specification text "Bandwidth" on page 13, line 4 was underlined and does not reflect an amendment to the as-filed specification.

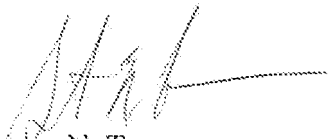

Applicant respectfully notes that, as discussed above regarding the replacement drawing sheets, the steps previously labeled 70 and 72 in FIG. 18 (see also Specification, p. 24, l. 13 to p. 25, l. 9) refer to different steps than the steps 70 and 72 in FIG. 17 (see also Specification, p. 24, ll. 1-12). Accordingly, FIG. 18 and the Specification have been amended to correct the labeling of these FIG. 18 steps (as 71 and 73). No new matter is added.

#### Conclusion

The present application is now in condition for issuance. The Examiner is encouraged to contact Applicant's undersigned attorney regarding any remaining issues in an effort to expedite issuance of the present application.

There are no fees believed due in connection with this Reply. However the Office is authorized to charge any additional fees that may be necessitated by this Reply to Deposit Account No. 50-1732.

Respectfully submitted,
